

# 807 Greenwich NSP Renovation

---

807 Greenwich was demolished to make way for a new energy efficient home. Construction of the house is being done by Habitat for Humanity and Alcoa Manufacturing. The workers from Alcoa are donating their time as part of Alcoa's "Month of Caring."

The home will include energy efficient features such as extra insulation, Tyvek wrap, "Hardy Plank" siding which is more durable than vinyl or aluminum, Energy-Star rated appliance, windows, and doors. As with all Habitat houses, the future home owners are contributing 250 hours of work toward completion of the house.

Habitat will also be constructing a house on Eastwich, to be completed in the Spring of 2011.

Habitat for Humanity, Alcoa, and the City of Lafayette, partnering for Lafayette's neighborhoods.
